

Carrier registration

Introduction

In order to simplify customs operations at customs and border checkpoints during international transport of goods, to adapt customs control to modern practices and to ensure an uninterrupted supply chain, the State Customs Committee(SCC) is launching the "Carrier registration" project. This initiative aligns with the EORI (Economic Operators Registration and Identification) system, widely used in international practices.

Purpose

Formation of a system for processing information on carriers and their vehicles intended for entry into the customs territory and identification of the information on customs operations in the recordation system.

Benefits

- Elimination of duplicate data submissions
- Expedited passage through customs and border checkpoints
- Opportunity for recognition as a trusted partner

Registration

The registration process consists of following steps:

- Click the link - <https://e.customs.gov.az/for-xif/carrier-register>
- Fill out the information
- Receive a registration code upon verification by the SCC

Note

When entering the customs and border checkpoint, it is required to present the carrier's registration code to the customs officer.
